## MOBILITY USE CASE ASSET INVENTORY

ASSESSING YOUR MOBILE ASSET INVENTORY

### WHERE ARE YOU NOW?

Simply by noting down how and where you use mobile devices will help you scope out a technology refresh. Use this worksheet to record all of the information in one place. You can then use it to see which areas of your business will be impacted and which to prioritize when it comes to your rollout.

## Step 3 – What is going on in the background?

Take the list of software applications from Step 2 and map the specific requirements you need to develop and support each one. This information will help you identify the skills you need to transfer any existing apps over to a new mobile system.
